舆情报告页面布局、日期筛选、列表分页以及监听分页事件
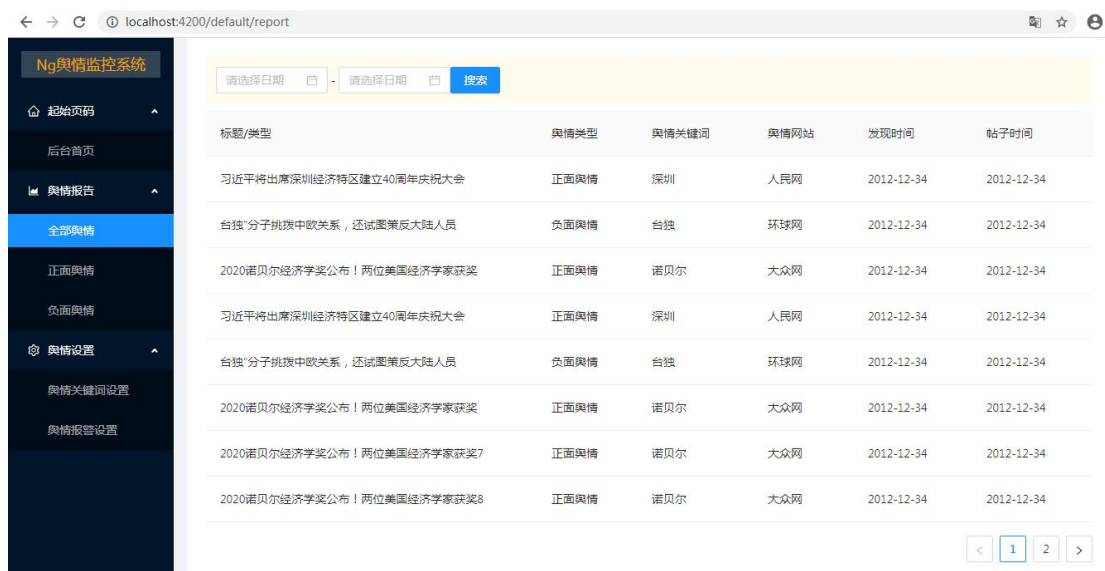

主讲教师：（大地）
合作网站：**www.itying.com** （IT营）
我的专栏：https://www.itying.com/category-79-b0.html

一、舆情报告页面

一、舆情报告页面布局

涉及组件：

日期组件：https://ng.ant.design/components/date-picker/zh
按钮组件：https://ng.ant.design/components/button/zh
表格组件：https://ng.ant.design/components/table/zh

一、表格的基本使用

```
<nz-table #basicTable [nzData]="listOfData">
    <thead>
      <tr>
        <th>Name</th>
        <th>Age</th>
        <th>Address</th>
        <th>Action</th>
      </tr>
    </thead>
    <tbody>
      <tr *ngFor="let data of basicTable.data">
        <td>{{ data.name }}</td>
        <td>{{ data.age }}</td>
        <td>{{ data.address }}</td>
        <td>
          <a>Action 一 {{ data.name }}</a>
          <nz-divider nzType="vertical"></nz-divider>
          <a>Delete</a>
        </td>
      </tr>
    </tbody>
</nz-table>
```

```
listOfData: [
  {
    key: '1',
    name: 'John Brown',
    age: 32,
    address: 'New York No. 1 Lake Park'
  },
  {
    key: '2',
    name: 'Jim Green',
    age: 42,
    address: 'London No. 1 Lake Park'
  },
  {
    key: '3',
    name: 'Joe Black',
    age: 32,
    address: 'Sidney No. 1 Lake Park'
  }
```

```
    ];
```

二、表格的分页

```
<div class="main_top">
    <nz-date-picker [(ngModel)]="start_time"    placeholder="起始日期"></nz-date-picker>
    -
    <nz-date-picker [(ngModel)]="end_time"    placeholder="结束日期"></nz-date-picker>
    <button nz-button nzType="primary">搜索</button>
</div>

    <nz-table #basicTable
    [nzData]="listData"
    [nzLoading]="loading"
    [nzTotal]="total"
    [nzPageSize]="pageSize"
    [nzPageIndex]="pageIndex"
    (nzQueryParams)="onQueryParamsChange($event)"
    >
        <thead>
          <tr>
            <th nzWidth="400px">标题/类型</th>
            <th>舆情类型</th>
            <th>舆情关键词</th>
            <th>舆情网站</th>
            <th>发现时间</th>
            <th>帖子时间</th>
          </tr>
        </thead>
        <tbody>
          <tr *ngFor="let data of listData">
            <td>{{ data.title }}</td>
            <td>{{ data.type }}</td>
            <td>{{ data.keyword }}</td>
            <td>
              {{ data.site }}
            </td>
            <td>
              {{ data.update_time }}
            </td>
            <td>
              {{ data.add_time }}
```

```
        </td>
      </tr>
    </tbody>
  </nz-table>
```

```typescript
import { Component, OnInit } from '@angular/core';
import { NzTableQueryParams } from 'ng-zorro-antd/table';
@Component({
    selector: 'app-report',
    templateUrl: './report.component.html',
    styleUrls: ['./report.component.scss']
})
export class ReportComponent implements OnInit {
    start_time="";
    end_time="";
    total=2;
    pageSize=7;
    pageIndex=1;
    loading=true;

    listData = [
      {
          title: '习近平将出席深圳经济特区建立 40 周年庆祝大会',
          urL:"http://www.xinhuanet.com/politics/leaders/2020-10/12/c_1126596607.htm",
          type: '正面舆情',
          keyword: '深圳',
          site: "人民网",
          update_time:'2012-12-34',
          add_time:"2012-12-34",
      },
      ...
    ];
    constructor() {}
    ngOnInit(): void {
    }
    onQueryParamsChange(params: NzTableQueryParams): void {
        console.log(params);
        this.total=this.listData.length;
        this.loading=false;
    }
}
```
